

# The Brands That Win Tomorrow Are Using Salesforce Marketing Cloud Today — Are You?

In a world of noise, brands that connect personally don't just stand out; they win loyalty, trust, and market share.

## Why It Matters

Marketing has changed. Customers don't want more messages; they want the right message at the right time.

**But here's the reality most businesses face:**

Campaigns feel disconnected across email, SMS, social, and ads.

Personalization sounds good, but scaling it is no walk in the park.

Data lives in silos, leaving you guessing instead of knowing.

Measuring impact across channels feels like a constant struggle.

And while many brands are still figuring this out, your competitors are already leveraging Salesforce Marketing Cloud to gain a competitive edge.

76% of consumers say personalized messages are essential in enhancing their consideration of a brand.
